

Free Workshop: Sensor Technology for Soil and Plant Monitoring

RSVP Essential! Limited spaces available

When: Wednesday, 1st August 2012, 9am to 5pm

Where: Centre for Land and Water, 21 Ruahapia Rd, Hastings

RSVP: Michael Forster: michael@ictinternational.com.au

Topics:

1. **The Neutron Probe:** improve your skills with the neutron probe including how it works, NPro Irrigation Scheduling Software, and the probe as a data storage device.
2. **Soil Water Content and Water Potential Sensors:** how to use your sensors to maximise accuracy, installation and calibration, and how to measure water potential with water content sensors.
3. **Plant Water Use:** precision sap flow technology for the monitoring of vine / tree health and water use, sap flow for horticulturalists and vineyard management, continuous measurement of plant water potential.

Presenters:

Dr Michael Forster, ICT International

Dr Iain Grierson, NPro and Barossa Valley Irrigation Services

Mr Alec Downey, ICT International

Solutions for soil, plant & environmental monitoring
